Press Release

12/10/2021

HTL CO. JAPAN LTD. BECOMES EXCLUSIVE DISTRIBUTION PARTNER OF WAYLAND ADDITIVE FOR JAPAN, KOREA AND TAIWAN.

HTL Co. Japan Ltd. is delighted to disclose that it has signed a partnership agreement with Wayland Additive as exclusive distributor in Japan, Korea and Taiwan.

HTL is very happy and proud to conclude the partnership with Wayland Additive to bring Calibur3 and further series, the new advanced Electron Beam (e Beam) technology for our customers. This “**NeuBeam**” technology has very advanced technology which is essential for the Additive manufacturing growth and this has been made possible by super team and management of Wayland Additive.

HTL is ending 2021 strongly and anticipate that this will continue into 2022 onwards with Wayland and Calibur3 series in our product family from now.

We are convinced that this technology will make a major change in the AM industry for years to come. Increased flexibility, high productivity and the previous key limitation with e Beam technology has finally been removed with Calibur3 and further series.

This opens up unlimited possibility to use “**NeuBeam**” technology for new materials and applications that was not possible till now.
